

iScrip 

creative thinking + effective solutions = satisfied customers

Our approach is shaped by the philosophy that creative thinking + effective solutions = satisfied customers. We build long-term relationships through an intricate understanding of client business which allows us to conceive and implement durable and sustainable systems.

CORPORATE PROFILE

BESPOKE SOFTWARE DEVELOPMENT & SYSTEMS INTEGRATION

iScrip applies innovative technical ideas and in-depth commercial expertise to the design and development of robust web-enabled applications.

PARTNERING WITH OUR CLIENTS in delivering software at a fixed price according to set timeframes and with concrete deliverables. A project-based environment ensures fast and effective time to market for commercial initiatives with an international delivery capability.

We are highly regarded within our niche area and dedicated developing innovative software products, solutions and services that enable our customers to manage their business with increased convenience and efficiency. This in turn translates to improved service offerings and a meaningful source of differentiation for our clients.

ROBUST INDUSTRY FOCUSSED SYSTEMS

iScrip is highly proficient at developing enterprise grade systems to the Financial and Telecoms sectors, whilst working across industry as delivery specialists.

Telecoms: A customer acquisition and credit vetting engine to manage processes for a major network service provider from the point of account origination through CRM to system support.

Financial Services: A system for an international financial software provider to manage and control the security lending desk activities at large banks.

Gaming: A resource planning system that deals with asset management, knowledge base maintenance, warehousing and workforce scheduling amongst maintenance functions in asset-intensive firms.

Mobile Banking and Transactional System: Enabling mobile transactions for the unbanked and under-banked market. This product supports account origination, client registration, deposit taking, cash withdrawals, money transfers, vendor payments and voucher vending.

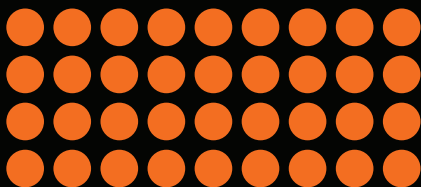

Voucher Distribution and Management: This product suite supports the distribution of vouchers such as prepaid cellular airtime and prepaid Eskom electricity.

CLIENT COMMITMENT

We count some of the most respected South African companies amongst our clients, including:

- MTN
- Sun International Limited
- Productivity SA
- SUNGARD
- Softline Pastel
